

PAKISTAN MEDICAL COMMISSION ISLAMABAD

Public Notice Demand of Fee in Advance from Enrolled Students

It has come to the notice of the Authority that some medical and dental colleges are demanding from enrolled students next year's annual fee in advance at this time.

It is clarified that the tuition fee is due and payable by a student on promotion to the next year after having passed their professional exam. No student can be compelled to pay the fee in advance or any penalty imposed on non-payment before the student has been promoted to the next year after results are announced.

A college may in advance at any time issue a fee challan for the fee payable for next year in advance but no delayed payment charges or any other penalty including the right of the student to sit in the professional exam shall be imposed prior to the result of the professional exam and the students promotion to the next year.

In the event the college starts classes for next year and provisionally allows all students to attend such classes before the announcement of the professional exam results, the college may require the student to pay at the time of starting of such provisional classes' fee on a monthly basis till such time as the results are announced.

A student may submit a complaint to the Authority in the event of any demand by a college which is in conflict with the above policy.
